EDUCATION

B.Tech CSE (AI/ML), VNR VJIET Hyderabad, India	Aug 2022 – Present
Intermediate (PCM), Sri Chaitanya Jr. College Hyderabad, India	Jan 2020 – Jan 2022

SKILLS

Programming: Python, SQL
AI / ML: Machine Learning, Deep Learning, NLP, Computer Vision, Multimodal Learning
Generative AI: Retrieval-Augmented Generation (RAG), Agentic Workflows, Prompt Engineering
Frameworks: PyTorch, LangChain, LangGraph, HuggingFace Transformers, FastAPI, Streamlit
Data Analysis: NumPy, Pandas, Matplotlib, Seaborn, EDA
Vector Infrastructure: ChromaDB, FAISS, Embedding Pipelines
Tools: Git, Docker, Linux, Jupyter, Google Colab

PROJECTS

Multimodal Medical Image Fusion for Brain Tumor Detection Python, PyTorch, Deep SVDD, Multi-Modal MRI	Sep 2025
- Implemented multimodal medical image fusion using PyTorch, evaluating 10+ fusion methods across metrics (PSNR, SSIM, Dice) on datasets including BraTS and TCIA. - Benchmarked ML models achieving 96.8% SVM accuracy, 0.96 Dice score with GAN fusion, and 99.24% transformer-based classification. - Analyzed limitations in medical AI pipelines including data scarcity and registration errors while targeting sub-200ms inference.	
Intelli-Credit: AI Credit Decisioning Engine Python, LLMs, PDF Parsing, Web Scraping	Nov 2025
- Built an LLM-based credit decision system generating Credit Appraisal Memos from GST, ITR, bank statements, and annual reports. - Developed data ingestion pipelines for PDF parsing and web scraping integrating MCA and e-Courts data. - Implemented a research agent detecting financial risk signals such as circular trading and litigation exposure.	
Agentic Retrieval-Augmented Generation (RAG) FastAPI, LangGraph, ChromaDB, Gemini LLM	Jan 2026
- Developed an agentic RAG architecture using LangGraph supporting multi-turn document and web Q&A. - Built a full LLM application stack using FastAPI, ChromaDB, Streamlit, and Gemini. - Implemented vector search retrieval with external knowledge tools (Tavily, DuckDuckGo).	
Multi-Agent Price Intelligence System Python, FastAPI, Gradio, LiteLLM, ChromaDB, Pydantic	Feb 2026
- Engineered a modular multi-agent architecture with 6+ specialized agents coordinated through a central orchestration framework. - Built an automated deal discovery pipeline scraping RSS + HTML feeds with LLM-based normalization into typed Pydantic schemas. - Implemented RAG-based pricing estimation using ChromaDB vector retrieval combined with ensemble model inference. - Developed a Gradio monitoring interface with streaming logs and automated opportunity alerts.	

EXPERIENCE

HR Head Street Cause (National NGO)	Jan 2024 – Dec 2024 Hyderabad
- Scaled chapter from 9 to 30+ volunteers (230% growth) via structured recruitment and onboarding. - Established official campus NGO representation improving participation and visibility.	
AR Head Student Force	Aug 2023 – Dec 2023 Hyderabad
- Conducted fundraising workshops with 30+ alumni training 100+ students. - Managed campus events (300+ attendees) coordinating teams of 20+ members.
