EDUCATION

B.Tech CSE (AI/ML), VNR VJIET <i>Hyderabad, India</i>	<i>Aug 2022 – Present</i>
Intermediate (PCM), Sri Chaitanya Jr. College <i>Hyderabad, India</i>	<i>Jan 2020 – Jan 2022</i>
ICSE (Class 10), Johnson Grammar School <i>Hyderabad, India</i>	<i>Jan 2019 – Jan 2020</i>

SKILLS

- **Languages & Databases:** Python, SQL, ChromaDB , Pineconne, FAISS
- **AI/ML Technologies:** Machine Learning, Deep Learning, NLP, RAG, Agentic Systems, Vector Databases
- **Frameworks & Libraries:** PyTorch, LangChain, LangGraph, FastAPI, Streamlit,
- **Developer Tools:** Git, Docker, Google Colab, Jupyter Notebook, Gemini

PROJECTS

Multimodal Medical Image Fusion for Brain Tumor Detection <i>Python, PyTorch, Deep SVDD, Multi-Modal MRI</i>	<i>September 2025</i>
- Analyzed 10+ fusion techniques across 8 metrics (PSNR, SSIM, Dice) on 5+ datasets (BraTS, TCIA), synthesizing performance trends from major studies. - Documented state-of-the-art results: 96.8% SVM accuracy with fused MRI-SPECT, a Dice score of 0.96 with GAN-based fusion, and 99.24% transformer-based classification. - Identified 6+ open challenges (e.g., data scarcity, registration errors) and outlined future directions for targeting sub-200ms inference in clinical settings.	
Intelli-Credit: AI Credit Decisioning Engine <i>Python, LLMs, PDF parsing, Web Scraping</i>	<i>Nov 2025</i>
- Built an AI-driven credit decisioning engine that ingested GST, ITR, bank statements, annual reports, and litigation data to auto-generate Credit Appraisal Memos (CAMs) with lend/no-lend, limit, and risk premium suggestions. - Implemented India-specific PDF/data pipelines and a research agent over MCA and e-Courts to flag risks like circular trading, revenue inflation, and high litigation exposure, improving transparency of credit decisions.	
Agentic Retrieval-Augmented Generation (RAG) <i>FastAPI, LangGraph, ChromaDB, Gemini LLM</i>	<i>Jan 2026</i>
- Built an agentic RAG system with a 4-node graph (ingestor, router, rewriter, chat router) to handle multi-turn PDF and web Q&A, enabling context-aware reasoning in a single workflow. - Engineered an end-to-end stack using Python, LangGraph, Gemini LLM, ChromaDB Cloud, FastAPI, and Streamlit, deploying an interactive web app for real-time querying. - Implemented vector retrieval with ChromaDB Cloud and integrated Tavily/DuckDuckGo web search tools, supporting a full conversation lifecycle via API endpoints.	

EXPERIENCE

AI Intern <i>Incluhub</i>	<i>March 2026 – May 2026</i> Hyderabad, India
- Collected and curated 5k+ fashion-specific data points (product attributes, trends, and brand metadata) to define high-quality inputs for a domain-focused knowledge base. - Built an automated data pipeline for continuous ingestion and preprocessing, improving AI retrieval relevance for fashion queries by enabling structured and up-to-date context. - Developed an AI agent using industry tools such as ElevenLabs and LLM frameworks, enabling voice-enabled interactions and task automation across fashion-related workflows.	
HR Head <i>Street Cause (National NGO)</i>	<i>Jan 2024 – Dec 2024</i> Hyderabad, India
- Scaled chapter from 9 to 30+ volunteers (230% growth) via structured recruitment and onboarding. - Secured official campus NGO representation, increasing organizational visibility and participation.	
AR Head <i>Student Force</i>	<i>Aug 2023 – Dec 2023</i> Hyderabad, India
- Conducted 3 workshops with 30+ alumni, training 100+ students on fundraising and NGO systems. - Led 2 campus events (300+ attendees each), managing end-to-end operations for a team of 20+ members.
