Summary

AI Engineer building owned **LLM / RAG** systems with **Python, FastAPI, LangChain, LangGraph, LangSmith, Postgres+pgvector**, and **React/Next.js**. I design end-to-end product — ingest, retrieve, reason, observe, deploy — not notebook demos. Targeting **GenAI / applied LLM** roles.

Technical Skills

Languages: **Python, JavaScript/TypeScript, SQL**

AI / LLM: LLMs, **LangChain, LangGraph, LangSmith, RAG**, agents, tool calling, prompt engineering, embeddings, vector databases (**pgvector**)

Web / Backend: **FastAPI, Next.js, React, React Native, REST APIs, Firebase, Vercel**

Data / Infra: **Postgres, Docker, Git, GitHub, GitHub Actions, GCP**

Experience

IncluHub — AI Intern → AI Orchestrator

Mar 2026 – Aug 2026

Fashion social + hiring network

Hyderabad

- Owned the **React Native + Firebase + GCP** fashion app: RBAC, multi-store data, CI via **GitHub Actions**, live to ~1,000–3,000 users.
- Shipped a CRM on **REST APIs** that replaced ~7–8 campaign Google Sheets for 3 salespeople (~100–150 leads/day in); after CRM, team throughput rose to ~70–100 calls/leads/day (~50%+ lift).
- Connected Meta Graph, WhatsApp, and Ads **APIs** into one CRM workflow so ads, leads, and follow-ups were not split across inboxes.
- Built the post-academic Student Dashboard (Admin / Educator / Student); live to ~40–50 students and ~4–5 educators.
- Sat in brand / client calls as the technical voice after mapping missing product features.

Street Cause, VNR VJIET — HR Head

Jan 2024 – Dec 2024

National NGO campus chapter

Hyderabad

- Ran campus HR: recruitment, onboarding, and volunteer ops; grew the chapter 9 → 30+ members (~230%).
- Owned staffing for drives and campus events reaching 300+ people per flagship programme.
- Set a repeatable onboarding loop so new volunteers could be deployed without founder-level hand-holding.

Projects

Brum — Voice Knowledge Assistant *Python, FastAPI, LangChain, LangGraph, LangSmith, Postgres/pgvector, Next.js*

github.com/pritamexe2k4-cmyk/brum-voice-assistant

- Designing and building Brum from scratch as an owned stack: voice + personal **knowledge base** with **LangGraph** turn graphs (**RAG** retrieve → reason → respond), traced in **LangSmith**.
- Document ingest → chunk → **embeddings** → **pgvector** on self-hosted **Postgres**; **FastAPI** backend + **Next.js/React** UI with auth; modular LLM/STT/TTS adapters; **Docker** deploy.
- MLOps lite: prompt/version in git, eval questions, observability via **LangSmith** — not a locked no-code host.

IncluHub Student Dashboard

Next.js, TypeScript, Supabase, Vercel

Live demo • [GitHub](#)

- Role-based education ops (Admin / Educator / Student) in **Next.js/TypeScript**; Auth + RLS; institutes, teams, stages, portfolio review, studio QR check-in.
- 22 **SQL** migrations + server actions on **Vercel**; founder flows replace sheet-based onboarding.

Education

VNR VJIET — B.Tech CSE (AI/ML)

2022 – 2026

Hyderabad

Extracurriculars

ElevX — Branding, Wording & Web

Creative / brand ops

<https://www.elevx.in/>

- Major contributor to ElevX brand wording, messaging, marketing, and website design for [elevx.in](https://www.elevx.in/).

Interests

Creative thinking, fitness, chess, books, research.
