Preetam Naik

Hyderabad, India | +91 9676290504 | pritam.exe2k4@gmail.com
github.com/pritamexe2k4-cmyk | linkedin.com/in/preetam-naik2k4

TECHNICAL SKILLS

Programming: Python, SQL

AI frameworks: LangChain, LangGraph, LangSmith, TensorFlow, Keras, scikit-learn

Data and databases: NumPy, Pandas, SQLite, PostgreSQL, Supabase

Model adaptation: LoRA and quantization fundamentals

Backend and tools: FastAPI, REST APIs, Streamlit, Git, GitHub Actions, n8n, Google Apps Script

WORK EXPERIENCE

IncluHub | AI Intern and AI Orchestrator

Hyderabad, India | March 2026 - August 2026

- Curated 5,000+ fashion-specific data points and developed ingestion and preprocessing workflows for a domain-focused knowledge base.
- Built an in-house CRM consolidating leads from approximately 8-9 Meta advertising campaigns; connected Meta Graph, Ads and WhatsApp APIs.
- Automated recurring lead and campaign operations using n8n, Google Apps Script and Google Sheets.
- Built a Next.js and Supabase school dashboard with Admin, Educator and Student workflows, authentication and row-level security.

PROJECTS

Harry Potter Conversational Assistant | GitHub

Python, LangChain, LangGraph, SQLite, LangSmith

- Implemented persistent, independent chat threads with SQLite archives and LangGraph checkpoints; added bounded history, summaries and interrupted-request recovery.
- Built 32 offline tests and 20 synthetic evaluation scenarios covering memory, thread isolation and spoiler boundaries; added optional LangSmith tracing for evaluation runs.

NeuroFuse | Multimodal Medical Image Fusion | GitHub

Python, diffusion models, ConvNeXt-B, Vision Transformer, Streamlit

- Contributed to brain-tumor classification research using diffusion-based MRI/CT image fusion, ConvNeXt-B classification and a Streamlit inference workflow.
- Team study reported fused-image accuracy of 98.20% with ConvNeXt-B and 98.88% with ViT; CT training data included CycleGAN-generated images.
- Co-authored the NeuroFuse research paper accepted at IEEE ICCCMLA 2026.

DoctorGemma | LLM Fine Tuning Study | GitHub

Gemma 3 4B, Unsloth, LoRA, 4-bit quantization, TRL

- Studied Gemma 3 4B fine-tuning with 4-bit quantization and LoRA on HealthCareMagic-100k; the reference notebook updates 14.9M parameters, 0.35% of the model.
- Reference notebook recorded training loss decreasing from 5.9254 to 3.0142 over 30 steps (49.1% lower); no held-out evaluation was reported.
- Based on Atharva Taras's DoctorGemma-3; personal extensions are in progress.

EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology

B.Tech, Computer Science and Engineering (Artificial Intelligence and Machine Learning)

Hyderabad, India | 2022 - May 2026 | CGPA: 7.5
